Professional Summary

A skilled Engineer and Full-Stack Developer with a strong background in building and optimizing digital platforms. Possesses deep expertise in Technical SEO, web analytics, and CMS customization. Seeking to leverage technical prowess to excel in a Web Content Management role, focusing on developing content strategies, enhancing user experience, and driving digital growth through data-driven decisions. Proven ability to manage projects and collaborate effectively with cross-functional teams.

WORK EXPERIENCE

2023 – currently

Full-Stack Developer & CMS Specialist.
Seeds org.

- Developed and customized robust Content Management Systems (CMS) to streamline content publishing workflows and empower editorial teams.
- Implemented technical SEO best practices (including site speed optimization, structured data, and clean URL structures) into the core of developed websites, improving search engine visibility and rankings.
- Collaborated with UI/UX designers to plan and implement user-friendly content presentation layouts, enhancing content accessibility and user engagement.
- Managed website performance and infrastructure using AWS, ensuring high availability and fast loading times for content delivery.

2021 – 2023

Backend Web developer.
Pigment soft company.

- Designed and developed backend systems and databases to support dynamic content organization and efficient management.
- Contributed to projects that required a deep understanding of content structure and data flow within web applications.

1 April 2019 - 2021

IEEE (TRAINING Program).

UNIVERSITY SCIENTIFIC RESEARCH PROJECTS COORDINATION

- Desktop Application Developer.
- DB Designer.
- IOT Systems Developer.

DUCATION AND TRAINING

1 Sep 2020 – 30 Jan 2021

TRAINING Programming Electrical Engineering

- Work on designing an agricultural device that depends on several sensors to store data and then send it for analysis if the land is suitable for agriculture according to the specific type of plants

Related Fields:
- Electric Sensors.
- Internet of Things.
- Software Technology for Embedded Systems.

2 Oct 2020 – 28 Aug 2020

Room air quality monitoring machine

Work on designing a room air quality device that depends on several sensors to store data and then send it for analysis and drawing measurements graphically

Related Fields:
- Electric Sensors.
- Internet of Things.
- Software Technology for Embedded Systems.
- Clouding
- C# programming
- Data analyzing and re leasing

1 April 2019 –1 June 2020

Portable mini oscilloscope designing.

- The design of the portable signal oscilloscope device is connected wirelessly to the computer, designed on electrical signal processors, connected to a digital processor device that sends the data for analysis, and a program designed in the programming language C-Sharp

Related Fields:
- Electronic integrated circuits.
- Internet of Things.
- Software Technology for Embedded Systems.
- C# programming

1 July 2016 – 1 January 2020

Bachelor of Engineering in Electric Electronic Engineering

Harran University

1-April-2011 _ 1-October-2012

Certificate of Secondary Education.

Altahrir Secondary School .

PERSONAL SKILLS

Programming Skills

Project Management: Strategic Planning, Performance Management, Cross-Functional Team Collaboration
Technical Web Development Skills
Backend: C#, ASP.NET Core (MVC/API), SQL Database Design
Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5,

CSS3, Tailwind, Bootstrap
Platforms & Tools: AWS, PWA
Web Content & SEO Management Skills
SEO: Technical SEO, On-Page SEO, Off-Page SEO, Local SEO, SEO Analytics & Reporting
Web Analytics: Google Analytics, Google Search Console
Content Management Systems (CMS): Custom CMS Development, WordPress Development, CMS Architecture

Management Skills

Leadership (learned as courses):
- Project Management fundamentals
- Strategic Planning and Decision-Making
- Performance Management

Soft Skills

Personal Effectiveness (learned as courses):
- Effective Communication
- Leadership & Team Management
- Time Management & Self-Motivation
- Critical Thinking & Problem-Solving
- Adaptability & Resilience

Learning

- Business & Organizational Acumen.
- Machine Learning

Mother tongue Arabic.

Other languages English: Intermediate. Turkish: advanced

PROJECTS

RELEVANT WEB & CMS PROJECTS

- **News Portal Website (ASP.NET Core 6)**
  - Developed a complete news website with a custom-built CMS, enabling editors to easily publish, schedule, and manage articles and multimedia content, significantly streamlining the editorial workflow.
- **Custom CMS Management Platform (ASP.NET Core 7, Next.js, PWA)**
  - Led the full-stack development of a scalable Content Management System from the ground up. The platform features intuitive content modules and a responsive admin panel, allowing non-technical teams to update website content efficiently.
- **Advertising Signage Management System (ASP.NET Core 8 API, Next.js, PWA)**
  - Built a dynamic content management system for digital advertising signs. The platform allows for remote management, scheduling, and real-time updates of promotional content across multiple displays.
- **Shipping & Logistics Portal (ASP.NET Core 8 API, Next.js)**
  - Developed a customer-facing portal with a powerful admin backend. The system manages and presents tracking information, service details, and policy content clearly and accessibly to users.

OTHER TECHNICAL PROJECTS

- Financial Accounting System (C#: ASP.NET Core 6)
- Schools Management System (C#: ASP.NET Core 3)
- City Transportation System (C#: ASP.NET Core 5)
- Various IoT & Embedded Systems Projects (C++, C#, Python, Assembly)
